

Two-in-one suspension

DiaDuo-2 is an all-purpose, two-in-one suspension containing both diamonds and lubricant, for materialographic fine grinding and polishing.

You only have to apply DiaDuo-2 to the correct level of lubrication and you will never overdose the amount of diamonds. The relation between diamonds and lubricant is always the same regardless of dosage.

DiaDuo-2 is a stable suspension and it can be used problem-free in automatic dosing systems with peristaltic pumps.

Diamond suspension and cooling lubricant combined into one product

Easy to clean after preparation

Does not contain solvents

Colour-coded

Contains monocrystalline diamonds for routine preparation

Easy to use

DiaDuo-2 is very easy to use for preparation and it is compounded to facilitate easy cleaning of the specimens after preparation. This makes DiaDuo-2 the best all-round diamond suspension available and the first choice, both for you who have non-complicated specimens and for you who have little or limited experience in materialographic preparation.

Water-based suspension

DiaDuo-2 is water-based and does not contain solvents. The composition of DiaDuo-2 is harmless and does not require any labelling. Hence, DiaDuo-2 is an environmentally friendly choice.

Colour-coded

DiaDuo-2 is colour-coded for easy identification of the diamond sizes. You will never mix up the different grain sizes.

Contains monocrystalline diamonds

DiaDuo-2 contains monocrystalline diamonds which makes it the premier choice for routine preparation. It ensures reproducible results even when using manual dispensers, as the level between diamonds and lubricant is always correct.

Specifications

Grain sizes	Contents	Code
1 µm	500 ml	40600036
	5 litre	40600041
3 µm	500 ml	40600037
	5 litre	40600042
6 µm	500 ml	40600038
	5 litre	40600043
