MD/DP-Dac

### Description
Thin polishing cloth used for immediate polishing steps. Very high degree of planeness with a high removal rate.

### Material
Very fine woven acetate with an adhesive backing / on a metal plate.

### Properties
- DP-Dac to be applied on a preparation disc. DP-Dac is self adhesive
- MD-Dac for magnetic fixation on MD-Disc. Black screen printing on the rear.
- Very stiff support where weave gives high degree of contact between textile and specimen.
- Re-usable.

### Application
Polishing of all materials. To be used with Struers diamond suspension with grain size 9 – 3µm.

### Health and Safety
- Whilst the MD/DP-Dac is rotating, ensure hands are kept well clear of the edge and out of the splash bowl.
- Do not exceed a rotational speed of 600 rpm.

To the best of Struers' knowledge, the products listed above do not contain any Substances of Very High Concern (SVHC) according to REACH regulations (amended on 20th June 2016) above 0.1%.

According to Hazardous Products Act (HPA) Section 2 this product is considered a manufactured article and defined as “any article that is formed to a specific shape or design during manufacture, the intended use of which when in that form is dependent in whole or in part on its shape or design, and that, when being installed, if the intended use of the article requires it to be installed, and under normal conditions of use, will not release or otherwise cause an individual to be exposed to a hazardous product”.

Therefore this product is exempted from WHMIS 2015 obligations on classification and labelling under stated normal conditions of use (HPA Section 12, point (i)).

See Instructions for Use for more information.
Skin protection

Wear protective gloves during polishing.

Respiratory Protection

It is recommended that the polishing machine is adequately ventilated during use of MD/DP-Dac.

Environmental precautions

Dispose of waste and residues as metal waste in accordance with local authority requirements.
