Polishing cloth. Very high degree of planeness with a high removal rate.

Plain, woven polyester with an adhesive backing / on a metal plate.

DP-Plan to be applied on a preparation disc. DP-Plan is self adhesive. MD-Plan for magnetic fixation on MD-Disc Black screen printing on the rear.

Plain weave structure ensures high degree of contact between specimen and textile increasing removal rate.

Re-usable.

MD-Plan: For fine grinding of soft metals. DP-Plan: pre-polishing of hard materials. To be used with Struers diamond suspension with grain size 15 – 3µm.

- Whilst the MD/DP-Plan is rotating, ensure hands are kept well clear of the edge and out of the splash bowl.
- Do not exceed a rotational speed of 600 rpm.

To the best of Struers’ knowledge, the products listed above do not contain any Substances of Very High Concern (SVHC) according to REACH regulations (amended on 20th June 2016) above 0.1%.

According to Article 3(3) of the REACH Regulation (EC) No 1907/2006, this product is considered an article and is defined as “an object which during production is given a special shape, surface or design which determines its function to a greater degree than its chemical composition”.

Therefore this product is exempted from CLP obligations and is outside the scope of the UN Globally Harmonized System of Classification and Labelling of Chemicals (GHS).

See Instructions for Use for more information.
Skin protection  
Wear protective gloves during polishing.

Respiratory Protection  
It is recommended that the polishing machine is adequately ventilated during use of MD/DP-Plan.

Personal Protection  
No requirements.

Environmental precautions  
Dispose of waste and residues as metal waste in accordance with local authority requirements.
